

Design view of the **TiendaOferta** window. It features a sidebar with three buttons: **Calcular** (yellow), **Nuevo** (yellow), and **Salir** (orange). The main area contains two input fields: **Numero de docenas adquiridas** and **Importe de Compra**, followed by a large text area for output.

Runtime view of the **TiendaOferta** window. It shows the same layout as the design view, with the sidebar buttons and input fields. The window title is "Cálculo de Ofertas de la Tienda".

Runtime view of the **TiendaOferta** window showing calculated results. The sidebar buttons are **Calcular**, **Nuevo**, and **Salir**. The input fields are **Numero de docenas adquiridas** and **Importe de Compra**. The output text area displays the following results:

- Importe de la Compra: 1600.00
- Importe del Descuento: 160.00
- Importe a Pagar: 1440.00
- Lapiceros de Obsequio: 16

The screenshot shows the graphical user interface of the application. It features a title bar with the text "Cálculo del Sueldo DE Trabajadores". On the left side, there are three green buttons: "Calcular", "Nuevo", and "Salir". The main area contains labels for "Tipo o Categoria:", "Ingrese Horas de Trabaj..", and "Cantidad de Hijos:", each followed by a corresponding input field. The "Tipo o Categoria:" field is a dropdown menu currently showing "Seleccio...". Below these inputs is a large, empty rectangular area for displaying results.
